

We Are Leading Air Cooling & Ventilation Service Provider

Ventex cooling India is one of the leading air Cooling & Ventilation Service Provider in Maharashtra. With 100+ satisfied customers across Maharashtra. we have been providing world class Air Cooling & Ventilation Solution to Residential, Commercial & Industrial Applications since 2021. Our aim to make Your Building Cool And Energy Efficient!

Why should Prefer Air cooling for your Building...!

- * **Environment Friendly**-Direct evaporative cooling minimizes reliance on harmful refrigerants and reduces carbon emissions by utilizing water evaporation as the basis for cooling.
- * **Low Maintenance Cost**- Maintaining evaporative coolers are generally simpler compared to traditional air conditioning units because of less complicated component.
- * **Humidity Regulation**- Evaporative cooling systems add moisture to the air during the cooling process, which can be particularly beneficial in dry climates.
- * **Low Running Cost**- With modern and innovative evaporative cooling you can save you up to 93% on cooling energy bills.
- * **Improved Air Quality and Ventilation**- Fresh air is a major benefit of evaporative air cooling, supplying 100% fresh, cool, outside air.
- * **Perfect Solution For Industrial and Commercial Building**- Direct Evaporative cooling is ideal for big areas, even in semi-open buildings. Sometimes businesses do not have any sort of air conditioning installed as it is too expensive since spaces are too big to be cooled or internal heat-load is too high.

* Comparison:Capex-Opex *

Parameters	Air Conditioner	Centrifugal Cooler	Axial Cooler	Ceiling Fan
Samples Area in sqft	10000	10000	10000	10000
Height- ft	11	11	11	11
Fresh air changes per hr	0	40	40	0
Capacity required	77 TR	75000 CFM	75000 CFM	125 CFM X 72 Nos
No. of Units required (Appr.)	51Nos X 1.5 TR	40000 CMH X 3 Nos	18000 CMH X 7 Nos	18200mm Dia X 72 Nos
Total Power(KW)	107	18	7.7	5.6
Operating cost in comparison to AC	100%	17%	7%	5%

How We Work

Ventex Cooling India is a Total Air Cooling & Ventilation Service Provider And ourTeam of Air Cooling Professionals Keep you in Loop Throughout The Process To Serve You Better...!

- Step 1: **Planning** - Site Visit, Building Assessment For Feasibility.
- Step 2: **Designing** - Cooling Capacity,Optimal Duct Path, AutoCad Design.
- Step 3: **Installation** - Duct,Machine & Accessories.
- Step 4: **Commissioning** - equivalent Air Flow & Cooling.
- Step 5: **Servicing**-Annual Maintenance (AMC).

Why Only Ventex Cooling?

- * Rich Quality Experience In Industrial, Commercial & Residential Projects.
- * Experienced Staff & Workers.
- * Provide One Year Service Warranty.
- * On Time Availability Of Spares Parts.
- * Strong Referrals And High Volume Of Repeat Business Proves Our Quality & Service.
